

Web Design Assignment

I have made a news website called Edge for my final assignment. It is a website based on science, technology, entertainment news and stories. The website consists of three pages. The pages include the main page (index.html), the About page, the Contacts page. It is made through a template downloaded from “startbootstrap.com” and is modelled on Bootstrap 5. Every page consists of semantic tags like the nav, header, footer, etc. The pages are made to be responsive for all sizes of devices. The main page consists of the title along with a logo from the “Font Awesome” website. It also has a “Carousel” of three images. The page ends there is the sticky footer. Also, I have added a Google calendar at the end of my main page. I have validated my site from w3 validator with zero errors and warnings. The four extras that I have added:

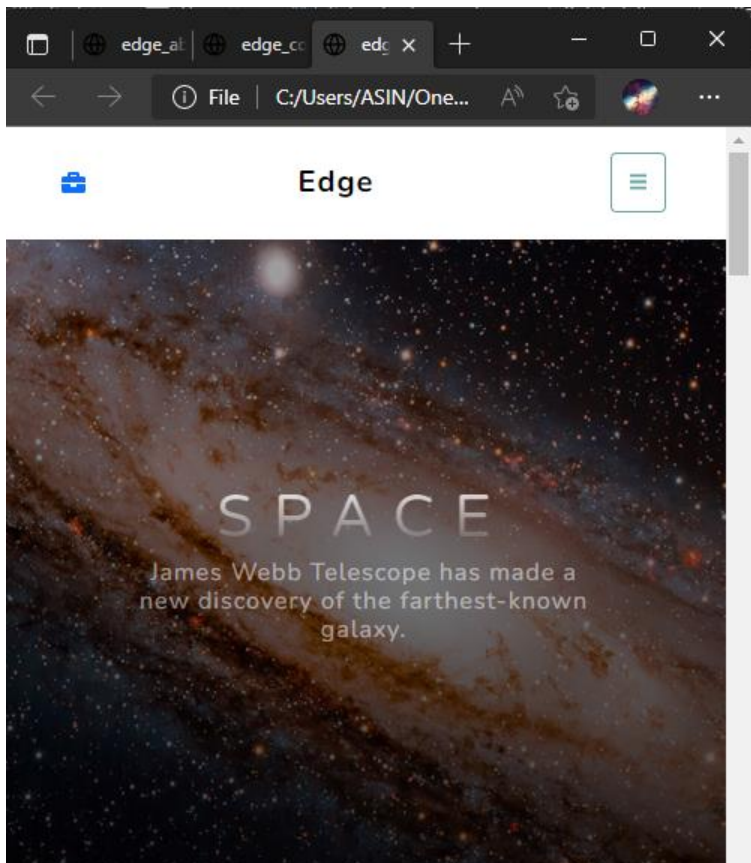

1. Carousel
2. Font Awesome
3. Sticky Footer.
4. Calendar
